

Predrag Jandric

Front End Developer

As a self-taught developer, I am fascinated about the creative process of web development and the ability to bring ideas to life through code.

I am excited to put my skills and experience to real use by joining a team and making a meaningful impact as a developer.

My future goal is to continue expanding my web development tools by learning React, PHP, and becoming a full stack developer.

Experience & Skills

2022 - Present

- Honed my skills with over 50 projects of various sizes in diverse Front-end technologies including HTML, CSS, JavaScript, Sass, Git Version Control, Bootstrap, Figma, and Photoshop.

Projects

- Mobile-first clone of the "Valve Corp" demonstrating my skills in responsive web design and Sass. [Link](#)
- My most ambitious project, my Portfolio, which showcases my expertise in software development. [Link](#)
- I designed and coded visually clean and appealing layout using Bootstrap with UI/UX rules in mind. [Link](#)
- Crafted a user-friendly and responsive web page that adapts seamlessly to all screen sizes. [Link](#)
